| • Node JS | • React | • HTML / CSS | • AWS |
| • Express | • Redux | • JavaScript | • Git / GitHub |
| • MongoDB | • PostgreSQL | • TypeScript | • SASS |

WORK EXPERIENCE

Back End Developer Intern (11/2020 - 12/2020) | Remote Work

at [Jugadu.in](#)

- Developed a secure, optimized and flexible REST API from scratch using Node.js & MongoDB
- Finished project in under a single month, beating the client's expected time of 2 months
- Communicated closely with the project manager to incorporate new features and achieve optimal results
- Optimized API to handle millions of Database entries without any slow-downs

PROJECTS

Node.js Web Scraper (10/2020)

[View Code](#)

- Created a web scraper with Node.js for automatically attending Microsoft Teams meetings
- The program mimics human behavior, joining meetings when they become available and leaving them when everybody else leaves

MERN Ecommerce Website (09/2020)

[Live Demo](#) [View Code](#)

- Built an e-commerce web application with Node.js, MongoDB, React & Redux, hosted on Amazon EC2
- Features credit card payment using Stripe API, product sales analytics, admin-role privileges, OAuth & more

Stock Price Website (08/2020)

[Live Demo](#) [View Code](#)

- Created a website that uses a third party API to display a chart detailing a company's stock price data

EDUCATION

Mixed High School (09/2017 - Present) - Tivat, Montenegro

[Mladost Tivat](#)
